DETAILED ACTION

1. This Office action is in response to Applicant's after final amendment. Claims 11-17 are canceled. Claims 18-19 are pending.

Allowable Subject Matter

2. Claims 18 and 19 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to a computer system for migrating operation from in-clear working to encrypted working between a first node and a second nodes over a communication link. Claim 19 identifies the unique features that "when there is a failure to establish a message encryption key a special key value is cached in the cache of said first node, the presence of which special key value serves to suspend attempts to establish said message encryption key". The closest prior art, Caronni et al. (U.S. Patent No. 5,822,434) teaches scheme to allow two computers on a network to upgrade from a non-secured to a secured session, Caronni either singularly or in combination, fails to anticipate or render the above underlined limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
